(a) FRS 8: Operating Segments (FRS 8)

FRS 8 requires segment information to be presented on a similar basis to that used for internal reporting purposes. As a result, the Group's segmental reporting had been presented based on the internal reporting to the chief operating decision maker who makes decisions on the allocation of resources and assesses the performance of the reportable segments. This standard does not have any impact on the financial position and results of the Group.

(b) FRS 101: Presentation of Financial Statement (FRS 101)

FRS 101 separates owner and non-owner changes in equity. Therefore, the current consolidated statement of changes in equity only includes details of transactions with owners. All non-owner changes in equity are presented as a single line labeled as total comprehensive income.

(c) Amendments to FRS 117: Leases (FRS 117)

Amendments to FRS 117 sets out the new requirement where leasehold land which is in substance a finance lease will be reclassified to property, plant and equipment. The Group has reassessed and determined that all leasehold land of the Group are in substance finance leases and accordingly, has reclassified the leasehold land to property, plant and equipment. The change in accounting policy has been made retrospectively in accordance with the transitional provisions of the amendment.

The reclassification does not affect the basic and diluted earnings per ordinary share for the current and prior periods.

The following comparative figures have been restated following the adoption of the amendments to FRS 117 :

(d) FRS 139: Financial Instruments - Recognition and Measurement (FRS 139)

FRS 139 sets out the new requirements for the recognition and measurement of the Group's financial instruments. Financial instruments are recorded initially at fair value. The Group determines the classification at initial recognition and for the purpose of the first adoption of the standard, as at transitional date on 1 January 2010.

Financial assets

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Assets in this category are classified as current assets.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the receivable. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. Loans and receivables are included in trade and other receivables in the balance sheet.

Available for sale financial assets

Available for sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Held to maturity financial assets

Held to maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity. If the Group were to sell other than an insignificant amount of held to maturity financial asset, the whole category would be tainted and reclassified as available for sale. Held to maturity financial assets are included in non-current assets, except for those with maturities less than 12 months from the reporting date, which are classified as current assets.

Financial liabilities are classified as financial at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

Its Singapore operations' were affected by increased competition in the country. It continued to create excitement and drive transactions at the restaurants via the introduction of new products such as Cherry Blossoms Pizza, Soft Shell Crabbiata Pasta, Crunchy Cheesy Bites Pizza, Big Bites Pizza, Parchment Pasta and Cheesy 7 Pizza. At the delivery front, it focused on its commitment in delivering HOT pizzas by launching the Hot Guarantee Campaign II which sustained its market share in the increasingly competitive delivery segment.

KFC Cambodia added three new outlets in the current year and are operating ten outlets as at end 2010. It registered encouraging sales but its profitability was affected by high costs of local poultry products and imported raw materials. Management is actively taking steps to source for cheaper alternatives and review its marketing programs to improve sales throughput at its restaurants.

The improved performance in the current quarter was primarily due to the higher sales from its KFC and Pizza Hut operations in Malaysia and the inclusion of a net surplus from revaluation of properties of RM6.7 million.

B3. Prospects for the Year

The economy in Malaysia and Singapore is expected to moderate to a lower growth in 2011 as compared to 2010.

The prevailing poor weather conditions in several large food producing countries have negatively impacted supply and coupled with the increasing demand from emerging economies would raise inflationary pressures on food cost. This could dampen consumer spending and may negatively impact the Group's restaurants throughput.

Management is taking several initiatives to develop and introduce new products with value propositions in mind to drive transactions at the Group's operating network. The Group will continue to implement its plan of increasing revenue and profitability by enhancing customer experience, increasing the restaurants network, expanding business activities, developing better cost efficiencies and improving productivity at all its restaurants, manufacturing and production facilities.

Based on the foregoing, the Board is confident of maintaining the Group's current growth trend for the year.
